Course Title: Hand Clinics 107

Course Subtitle: Imaging the Distal Radioulnar Joint

Course Description:

Hand Clinics 107, Imaging the Distal Radioulnar Joint, is a 1-hour course designed for the intermediate to advanced clinician working with patients with distal radioulnar joint injuries. This course will explore the anatomy of the distal radioulnar joint along with various imaging techniques including radiography, scintigraphy, MRI and more. An overview of each technique along with advantages and indications will be reviewed. Clinicians working with patients with wrist injuries must have knowledge of imaging methodology in order to communicate effectively with other healthcare professionals and make appropriate professional recommendations as an important member of the healthcare team.

Target Audience: OT/OTA

Course Length: 1 hour

Course Author/Instructor: Brown, MS, OTR/L, CHT

Educational Level: Introductory, Intermediate, Advanced

Course Objectives:

At the end of this course, participants will be able to:

- List and describe 3 imaging techniques used to image the DRUJ
- Compare and contrast 3 imaging techniques
- Describe radiography for the DRUJ, listing 3 advantages and indications
- Describe scintigraphy for the DRUJ, listing 3 advantages and indications
- Compare and contrast CT scan and MRI of the DRUJ
