AOTA Approved Provider #4023

Course Title: Pediatrics 226

Sub-Title: Visual Perception

Target Audience: OT/OTA

Course Length: 3 hours

Course Author/Instructor: Brown, MS, OTR/L, CHT

Educational Level: Introductory, Intermediate, Advanced

The course is written at the intermediate level, but learners of all levels will benefit from the information.

Course Objectives:

At the conclusion of the course, participants will be able to:

- Define visual perception
- Describe the typical development of visual-perceptual skills
- Identify factors that contribute to typical or atypical development of visual perception
- Explain the effects of visual-perceptual problems on occupations and life activities such as activities of daily living, education, work, play, leisure, and social participation
- Describe models and theories that may be used in structuring intervention plans for children who have problems with visual-perceptual skills
- Identify assessments and methods useful in the evaluation of visual-perceptual skills in children
- Describe intervention strategies for assisting children in improving or compensating for problems with visual-perceptual skills
- Give case examples, including principles of evaluation and intervention.
