AOTA Approved Provider #4023

Course Title: Pediatrics 236

Course Subtitle: Children with Complex Medical Issues: Fetal Alcohol Spectrum Disorders

Source: Children with Complex Medical Issues in Schools: Neuropsychological Descriptions and Interventions, 1st ed., by Christine L. Castillo, PhD, LSSP

Source Description: Increasingly, children with significant medical issues are being incorporated into the general school environment. Given the potential effects of various disorders and conditions on educational prognosis, it is important for neuropsychologists, pediatric psychologists, school psychologists, teachers, and other healthcare professionals who are working with these children to be aware of the nature and course of the many disorders as well as the avenues for rehabilitation, accommodation, and classroom modification.

In *Children with Complex Medical Issues in Schools*, Dr. Castillo bridges the gap between research and practice and provides a concise, yet thorough reference that covers a broad range of conditions in each individual course. Each lesson is written with practical expertise with each disorder and includes: case studies, recommendations for educational modifications and accommodations, data regarding morbidity and mortality rates, related medical issues, and common medical treatment, interventions for children with specific medical disorders, along with educational resources that may be accessed via the internet or through other literature.

See course outline below for details and inclusive content in Pediatrics 236 course.

Target Audience: OT/OTA and other healthcare professionals

Course Length: 1 hour

Course Author/Instructor: Christine L. Castillo, PhD, LSSP / Brown, MS, OTR/L, CHT

Educational Level: Introductory, Intermediate, Advanced

The course is written at the intermediate level, but learners of all levels will benefit from the information.

Course Objectives:

At the conclusion of the course, participants will be able to:

- Become familiar with fetal alcohol spectrum disorders

- Outline and describe key facial abnormalities and the atypical growth patterns characteristic of fetal alcohol spectrum disorders
- List and analyze comorbid factors associated with fetal alcohol spectrum disorders
- Recite and describe 3 of the most effective interventions for children effected by fetal alcohol spectrum disorders
- Read case studies and discuss the significance of clinical application to children with fetal alcohol spectrum disorders

Outline of Content:

Hour #1

Description of the Disorder

Comorbid Factors

Case Continuation

Assessment Results

Interventions

Preschool Children

School-Age Children and Adolescents

Conclusion
