Course Title:  Stroke Rehab 130

Course Subtitle:  Driving and Community Mobility as an Instrumental Activity of Daily Living

Source:  Stroke Rehabilitation, 4th ed by Gillen

Source Description: Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen’s Stroke Rehabilitation: A Function-Based Approach, 4th Edition. Using a holistic and multidisciplinary approach, this text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Key features include: Evidence-based clinical trials and outcome studies, survivor's perspectives, case studies, and a multidisciplinary approach highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. See an outline of course content for additional information.

Target Audience: OT/OTA and other healthcare professionals

Course Length:  3 hours

Educational Level: Introductory, Intermediate, Advanced

The course is written at the intermediate level, but learners of all levels will benefit from the information.

Course Objectives:
At the end of the course, participants will be able to:

- Understand the instrumental activity of daily living (IADL) of driving and community mobility as a highly valued but complex occupation
- Identify the risk factors for the IADL of driving and community mobility and appropriately implement evaluation and intervention strategies
- Addressing this IADL either through interventions to prepare for the resumption of driving, make an appropriate referral to a driver rehabilitation specialist, or assist with a comprehensive community mobility plan

Outline of Content:
INTRODUCTION
The Impact of the Baby Boomers
OT Roles in Stroke Rehabilitation
Stakeholders Considered with Driving
The Profession of Driver Rehab
The Driver Rehabilitation Specialist and OT
Levels of Service for Driving
Screening and Evaluation Process for Driving and Community Mobility
Evidence and Clinical Judgment in Determining Risk for Driving
Evidence-Based Assessment Tools for Driving Fitness
Evidence of Interventions for Improving Fitness to Drive
Interactive Driving Simulators
Adaptive Equipment and Vehicle Modification for Driving
Alternative Transportation Options
SUMMARY

Instructional Methods and Formats:
Online course available 24/7 at www.OnlineCE.com includes PDF downloadable course. See course formats for additional details.

Course Completion Requirements:
A minimum passing score of 100% is required for course completion. You will have as many attempts as needed until your passing score of 100% is achieved. Upon successful completion of the course, you will receive your certificate of completion and AOTA eligible CEUs.

AOTA Classification Codes:
   Category 1: Domain of OT
   Category 2: Occupational Therapy Process
   Category 3: Professional Issues
