Course Title: Stroke Rehab 136

Course Subtitle: Home Evaluation and Modifications

Source: Stroke Rehabilitation, 4th ed by Gillen

Source Description: Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen’s Stroke Rehabilitation: A Function-Based Approach, 4th Edition. Using a holistic and multidisciplinary approach, this text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Key features include: Evidence-based clinical trials and outcome studies, survivor's perspectives, case studies, and a multidisciplinary approach highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. See an outline of course content for additional information.

Target Audience: OT/OTA and other healthcare professionals

Course Length: 2 hours

Educational Level: Introductory, Intermediate, Advanced

The course is written at the intermediate level, but learners of all levels will benefit from the information.

Course Objectives:
At the end of the course, participants will be able to:

- Apply methods of assessing the home environment for barriers
- Understand architectural guidelines as established by the American National Standards Institute
- Implement methods for modifying the home environment and increase safety and mobility independence for patients recovering from stroke
